

Tasman Norbright 70

Utilisation finale: Newspapers, direct mail, free-sheets, directories, supplements, inserts/flyers, magazines, books

The Norbright range offers higher brightness properties and an enhanced printed image compared to newsprint. These products are especially well suited to cold set web offset, although they can also be used for heat set.

The use of modern, twin wire paper machines and modern thermomechanical pulping processes ensure the high performance characteristics of the product.

Caractéristiques de base	ISO			
Grammage	(ISO 536)	(g/m ²)	48.8	52
